Good looking

Simple and sleek 'native' look as compared to many Android apps which have a 'custom' feel

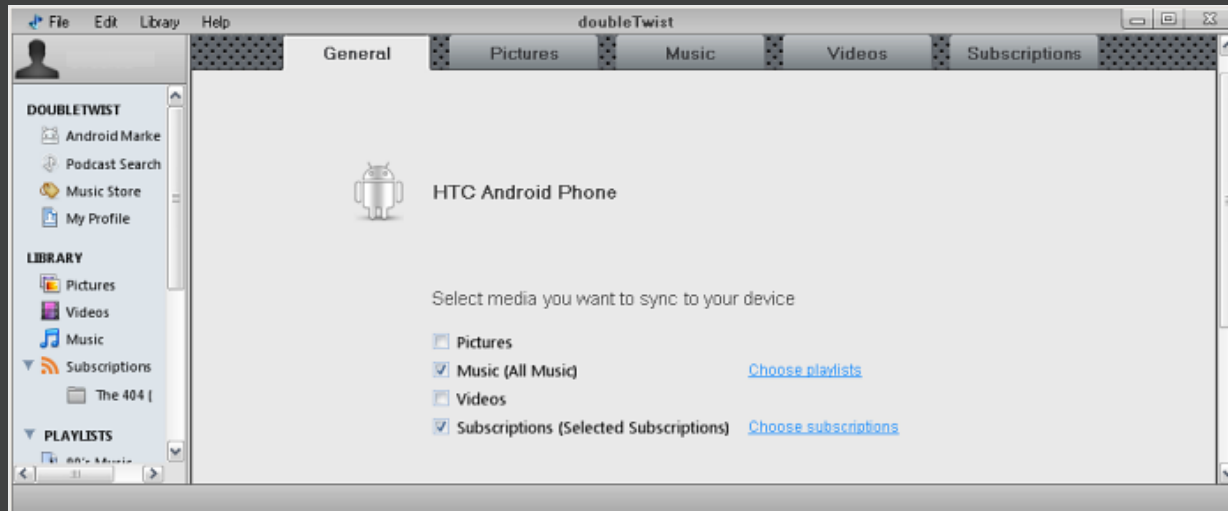

Easy to use

Clear interface allows user to search quickly by artist, album, song title, or playlist

Free

Secret Sauce

Complementary desktop app allows users to sync audio/video/pictures/playlists seamlessly and with more flexibility than iTunes

Competition

Easily beats default media player app in:

- Looks
- Ease of use
- Features

Critique

- Going back is awkward
- Playlist creation is clunky
- No Linux support
